My day in reviews

- Change in devstack:

```
536      +   if [ -z "$VRIT_DRIVER" ]; then
537      +       # If there is not virt driver defined we assume nova is not installed
538      +       iniset $TEMPEST_CONFIG service_available nova "False"
539      +   fi
540      +
```
